We are committed to protecting your privacy. This Privacy Policy includes guidelines for protecting your information and, depending on your jurisdiction, describing your rights under applicable data protection laws. This Privacy Policy discloses what type of information is collected, the methods used to collect it, how we utilize the information to better serve all interested parties and the choices you have about the way your information is collected and used.

Please read this Privacy Policy carefully. If you do not agree with our policies and practices, your choice is not to use our Service. By accessing or using the Service, you agree to this Privacy Policy. This Policy may change from time to time (see Changes to the Privacy Policy section below). Your continued use of the Service after we make changes is deemed to be acceptance of those changes, so please check this Privacy Policy periodically for updates.

## **1. INFORMATION WE COLLECT**

1.1. **Collected Information.** We collect Personal Data and Anonymous Data as described below. For purposes of this Privacy Policy “**Personal Data**” means data that allows someone to identify you individually, including, for example, your name, email address, as well as any other non-public information about you that is associated with or linked to any of the foregoing and “**Anonymous Data**” means data, including aggregated and de-identified data, that is not associated with or linked to your Personal Data. Anonymous Data does not, by itself, permit the identification of individual persons.

### **1.2. Information You Provide Us.**

(a) Account Information. You may be required to have a user account to use the Site or the Service. When you use our Service, update your account profile, create or update your user account, or contact us, we may collect Personal Data from you, such as email address, first and last name, user name, and other information you provide. We also collect your blockchain address, which may become associated with Personal Data when you use our Service.

(b) User Preferences. Our Service lets you store preferences like how your content is displayed, notification settings, and favorites. We may associate these choices with your blockchain address, browser, or mobile device.

(c) User Communications. If you provide us with feedback or contact us, we will collect your name and contact information, as well as any other content included in the message.

(d) Other User Provided Information. We may also collect Personal Data at other points in our Service where You voluntarily provide it or where we state that Personal Data is being collected. For instance, if you sign up for a sweepstake, when You make a purchase, complete a survey, subscribe to our newsletter or register for any portion of our Services, you are asked to provide information (e.g., your e-mail address, name or phone number).

(e) User Provided Information is Voluntary. Providing Us with Personal Data about Yourself is voluntary, and You can always choose not to provide certain information; however, You may not be able to take advantage of or participate in some of the Site's features or our Service.

### 1.3. **Information Collected via Technology.**

(a) Automatic Data Collection. As you navigate through and interact with our Service, we may use automatic data collection technologies to collect certain information about your equipment, browsing actions, and patterns, including the information discussed in the rest of this Section.

(c) Log Files. We gather certain information automatically and store it in log files. This information includes IP addresses, browser type, Internet service provider (“ISP”), referring/exit pages, operating system, date/time stamps, and clickstream data. We use this information to analyze trends, administer the Service, track users' movements around the Service, and better tailor our Services to our users' needs. For example, some of the information may be collected so that when you visit the Service, it will recognize you and the information can be used to personalize your experience.

(d) Cookies. A cookie is a small file that asks permission to be placed on Your computer's hard drive; You may control whether or not you permit the use of cookies. Please note that if elect to not permit cookies this may prevent You from taking full advantage of our Service.

(e) Pixel Tag. In addition, we use “**Pixel Tags**” (also referred to as clear Gifs, Web beacons, or Web bugs). Pixel Tags allow us to analyze how users find our Service, make the Service more useful to you, and tailor your experience with us to meet your particular interests and needs. Our systems do not currently recognize "do not track" signals or other mechanisms that might enable users to opt out of tracking on our Site.

(f) Analytics Services. In addition to the tracking technologies we place like cookies and Pixel Tags, other companies may set their own cookies or similar tools when you visit our Service. This includes third-party analytics services (“**Analytics Services**”) that we engage to help analyze how users use the Service. The information generated by the cookies or other technologies about your use of our Service (the “**Analytics Information**”) is transmitted to the Analytics Services. The Analytics Services use Analytics Information to compile reports on user activity, which we may receive on an individual or aggregate basis. We use the information we get from Analytics Services to improve our Service. The Analytics Services may also transfer information to third parties where required to do so by law, or where such third parties process Analytics Information on the behalf of the Analytics Services. Each Analytics Services' ability to use and share Analytics Information is restricted by such Analytics Services' terms of use and privacy policy. By using our Service, you consent to the processing of data about you by Analytics Services in the manner and for the purposes set out above.

1.4. **Information Collected from Third-Party Companies.** We may receive Personal and/or Anonymous Data about you from companies that offer their products and/or services for use in conjunction with our Service or whose products and/or services may be linked from our Service. For example, third-party wallet providers provide us with your blockchain address and certain other information you choose to share with those wallets providers. We may add this to the data we have already collected from or about you through our Service.

1.5. **Public Information Observed from Blockchains.** We collect data from activity that is publicly visible and/or accessible on blockchains. This may include blockchain addresses and information regarding proposal submissions, proposal voting, fund deposits, membership in, and any other interaction that you have with an Organization that utilizes the StackerDAO Operating System, which may then be associated with other data you have provided to us.
